2022

1. Descriptive Analysis — What is happening?

Focus: Summarizes historical data

Summary of past performance

FACTS

- Avg Occupancy Rate is 32.8%. Dublin leads at 38.5%.
- Cergy-Pontoise is lowest

2. Diagnostic Analysis - Why did it happen?

Focus: Identifies trends and patterns

Helps understand the reason behind the results

FACTS

- Cergy-Pontoise's closure rate (71.1%) is far above the network average (7.3%), suggesting an operations issue rather than low demand.

3. Predictive Analysis - What is likely to happen?

Focus: Uses data to forecast outcomes

Heps prepare for future opportunities and risks

FACTS

- Based on the 2022–2025 trend, occupancy is projected to continue fluctuating within the historical range

4. Prescriptive Analysis - What should we do about it?

Focus: Recommends actions to improve performance

Recommends actions to improve performance

FACTS

- Focus on Cergy-Pontoise and Marseille for immediate station audits; benchmark Dublin, Toulouse, and Nantes for best practices.
